

# WORLD'S MOST ADVANCED TILLAGE MACHINES FOR HIRE

**PRO-TILL  
6M and 8M**

## **The Ultimate in High Productivity Seed Bed Preparation**

Designed to shred and blend heavy residue, open up soils, level ruts, destroy clods and produce an absolutely perfect seed bed in wet or dry conditions - all at a 16 kph (10 mph) working speed.

The Pro-Till's seed bed enhances yield through better soil condition, nutrient activity and moisture profile. It features floating Self-Contour Technology, flawless rock protection and a very heavy frame and componentry.

**Degelman**

**TIGER 6MT and 4MT**

## **The Ultimate In Cultivation Productivity**

Achieve in one pass what normally takes 3 passes - chop and blend residue, deep rip (up to 35 cms), clod breakdown and seed bed leveling.

Doing all in one pass saves massively on the cost, time and moisture losses of multiple workings.

The Tiger is especially effective at cotton pupae busting, soil regeneration and dealing with heavy residue and soils.

**HORSCH**

*Farming with passion*

## **In today's capital intensive farming environment hiring high-end equipment makes good sense:**

- △ No capital outlay is required
- △ Access can be gained to leading-edge, expensive and well-maintained equipment
- △ Hiring equipment is a 100% tax deductible expense in the year it is used
- △ Farmers don't have to worry about depreciation and wear and tear
- △ When dry hiring the farmer can use his own tractor and labour in the operation thereby retaining control over a major part of the operational cost
- △ An expensive machine is not spending most of the year laying idle (and therefore tying up precious cash that can be better used elsewhere)

**The bottom line is that unless you are regularly covering very large areas with these type of machines it is financially better to hire instead of purchasing**

## **About SawleyCo**

SawleyCo is a specialised agricultural services company with generations of farming and contracting experience. Our sole focus is to help farmers improve their productivity. We strive to bring solutions that increase revenue, decrease costs and improve asset utilisation.

### **Our business culture is founded on 3 key principles:**

- △ Excellent customer relationships built on outstanding service
- △ A continually evolving suite of advanced products and services that deliver real productivity improvement
- △ A great team
